Education

Indiana Wesleyan University	Marion, IN
Master of Science: Artificial Intelligence (AI) with a specialization in Data Analytics	June 2025 – Aug. 2026
Denison University	Granville, OH
Bachelor of Arts: Data Analytics with a concentration in Economics	Aug. 2020 – May 2024
Minor in Mathematics, Minor in Computer Science	

Technical Skills

Languages	Proficient: Python, R, and SQL (MySQL, PostgreSQL, and Google BigQuery)
	Experience: Power BI, Tableau, and Looker Studio
Tech Stack	Git, Jupyter Notebook (Anaconda), Microsoft Office Suite, and Google Colab

Relevant Experience

Bank of Montreal Commercial Bank	Chicago, IL
Anti Money Laundering Analyst	Sept. 2024 – June 2026
- Actively identified and flagged over 300+ non-compliant entities, ensuring 100% accurate client risk ratings and audits across AML/KYC frameworks through detailed, organized records. - Conducted enhanced due diligence (EDD) and AML/KYC investigations for 100+ high-risk clients weekly, including PEP, adverse media, and OFAC screenings, ensuring 100% of clients’ AML compliance. - Improved KYC procedures through weekly Q&A management, mitigating potential financial crime exposure and strengthening institutional due diligence practices.	

Denison University Institutional Analytics Hub	Granville, OH
Data Analyst	Feb. 2024 – Sept. 2024
- Developed and deployed Denison’s in-house College Compare Tableau dashboard using 60+ parameters of US universities and colleges by sourcing, merging, and cleaning publicly available IPEDS survey data for public benchmarking. - Designed and optimized ETL pipelines within the Operational Data Store (ODS) using Microsoft Access and Tableau Prep, improving data integrity, reducing redundancy, and accelerating reporting efficiency across institutional datasets. - Conducted statistical analysis on tuition pricing to identify potential triggers for tuition freezes among 834 data points of public universities by feature engineering 6 key control variables and designing IPEDS reporting interfaces for reports.	

Saladin Insurance Insurtech Company	Ho Chi Minh City, Vietnam
Business Intelligence Intern	May 2023 – July 2023
- Optimized 15 Looker Studio dashboards by refactoring BigQuery SQL queries and removing redundant fields, improving load times by 40% and enabling faster performance tracking in recurring business reviews. - Built and deployed 8 interactive Google Looker Studio dashboards for the Core Insurance Product & Strategy team, visualizing KPIs across 10 insurance partners and multiple product categories. - Analyzed 50 product and service delivery datasets to support new insurance initiatives, identifying 50,000 potential customers and uncovering 5 key demographic segments for targeted marketing campaigns.	

Academic Research & Projects

The International Society of Data Scientists, <i>Facial Beauty Prediction with Vision Transformer</i>	Dec. 2022 – Nov. 2023
- Led the development and publication of a Vision Transformer model designed to assess human facial attractiveness, optimized deep learning pipelines for computational efficiency, and reduced training time from 1 hour to 15 minutes. - The model outperformed baseline CNN architectures (VGG16, ResNet-50) on benchmark datasets, achieving a Mean Absolute Error (MAE) of 0.21 and a Pearson correlation coefficient of 0.92.	
Licking County Aging Partners (LCAP), <i>Data Analytics Consultant Project</i>	Sept. 2022 – Dec. 2022
- Led a 3-member team analyzing 3000+ senior residents’ data (2019–2022) using R Studio and Python to validate market personas, optimize customer segmentation, and inform targeted advertising strategies. - Applied K-means clustering to segment 30+ services from LCAP across Newark, Pataskala, and Granville, identifying the optimal service mix and developing three 5-year strategic marketing plans to enhance customer engagement and program outreach.
